## WORK EXPERIENCE

### Associate Software Engineer
**Hexaware Technologies**

*03/2022 - Present*                               *chennai / India*

*Achievements/Tasks*

- Participated in a 6-month training program. Contributed to the development and maintenance of automation frameworks such as selenium, cucumber and scripts.
- Acquired knowledge and skills in full stack development, with a focus on React JS. Worked on a React JS project, where I developed and maintained the user interface using Material UI, React JS, React hooks and fetch API's, and JavaScript.
- Gained experience in Agile methodologies and participated in Agile ceremonies such as daily stand-ups, sprint planning, and retrospective meetings.
- Learned about other technologies and tools used in the IT industry, such as Git, JIRA, and Jenkins, and gained exposure to MERN stack. Demonstrated excellent communication and collaboration skills while working in a team environment
- Worked with automation tools such as JMeter for performance monitoring, Burp suite for security scan and postman for API testing.
- Overall, my experience at Hexaware Technologies has allowed me to gain valuable insights into the IT industry, and I have developed a strong foundation in automation testing and full stack development.

## EDUCATION

### Bachelor of Engineering
**Rajarajeswari College Of Engineering**

*04/2018 - 04/2022*                               *India , Bangalore.*

*Courses*

- Computer Science and Engineering.

## SKILLS

React JS   Node JS   Express JS   MangoDB

REST api   Mangoose   Material UI   GIT

Javascript   Bootstrap   Front-end   selenium

jMeter   Burp suite   cucumber

Automation Testing

## PERSONAL PROJECTS

### Personal Portfolio
- Developed a personal portfolio website utilizing React JS, React hooks and Material UI. Designed an intuitive and visually appealing interface to showcase my skills, experience, and projects. Integrated various features such as contact forms and responsive layouts to improve user engagement.
- link - **https://portfolio07ajju.netlify.app**

### React web application - Contact App
- Developed a web application using ReactJS and Material UI that utilizes CRUD operations to allow users to manage user data. The application utilizes React Router for routing and a JSON data server for its API.
- Users can view a list of users and perform operations such as adding, editing, and deleting users. The application is designed with a modern and user-friendly interface using Material UI components, allowing for a seamless user experience
- link - **https://react-contact-project.vercel.app/**

### Weather App
- This project is a weather app built using Node.js, Express.js and HTTP requests to make API calls. The website features a search bar where users can input their desired location and receive weather data for that location in real-time
- The app utilizes API data to provide accurate and up-to-date information to the user
